

When laptops are taken out of the district, the users need to know the following things:

When logging in, they must log in as User, password brfsd, and choose the laptop name in the third box (clicking on the third box will bring up a drop down list)

The screenshot shows the Windows XP Log On screen. The 'User name' field contains 'hssub'. The 'Log on to:' dropdown menu is open, showing a list of computer names: 'DO-630-07 (this computer)', 'BRF', 'BRFBAGS', 'BRFPHX', and 'DO-630-07 (this computer)'. The 'DO-630-07 (this computer)' option is highlighted. A callout box points to the 'User name' field with the text 'Change user name to User'. Another callout box points to the dropdown menu with the text 'Choose computer name'. A third callout box on the right contains the text 'Make sure user "User" can log in to the computer BEFORE taking it out of the district.'

Once logged in, they will need to connect to the wireless network wherever they are. To do that, they should **right-click** on the wireless icon in the lower right side of the screen and choose View Available Wireless Networks.

The screenshot shows the Windows XP taskbar with the wireless network icon highlighted. A context menu is open over the icon, listing options: 'Disable', 'Status', 'Repair', 'View Available Wireless Networks', 'Change Windows Firewall settings', and 'Open Network Connections'. A callout box points to the 'View Available Wireless Networks' option with the text 'Wireless icon'.

The screenshot shows the 'Choose a wireless network' dialog box. The 'BRFSD' network is listed as 'Connected'. A callout box points to the list of networks with the text 'Any available networks will be listed in this box. Click on the one you want to connect to, and click on the Connect button.'
